Chester County's Leading Information Source

FRIDAY, December 5, 2003

■ **TAX TECH:** Vertex Inc. of Berwyn, a provider of tax technology solutions, Thursday introduced an online service for the leasing industry that enables companies to access taxability rules and rates specific to equipment and vehicle leasing.

Vertex Leasing Rates Online provides companies with real-time access to a comprehensive leasing-specific database that simplifies tax administration by incorporating all relevant tax parameters.

Instead of relying on manual processes to garner tax data, companies that provide or acquire leased equipment or vehicles now have a single source to view the latest rules and rates from across the nation.

Businesses and organizations can evaluate the database for free through a 15-day online trial by contacting Vertex at 800-355-3500.
