

Vertex® Indirect Tax O Series® for Oracle E-Business Suite®

Vertex Integrates with these Oracle Modules:

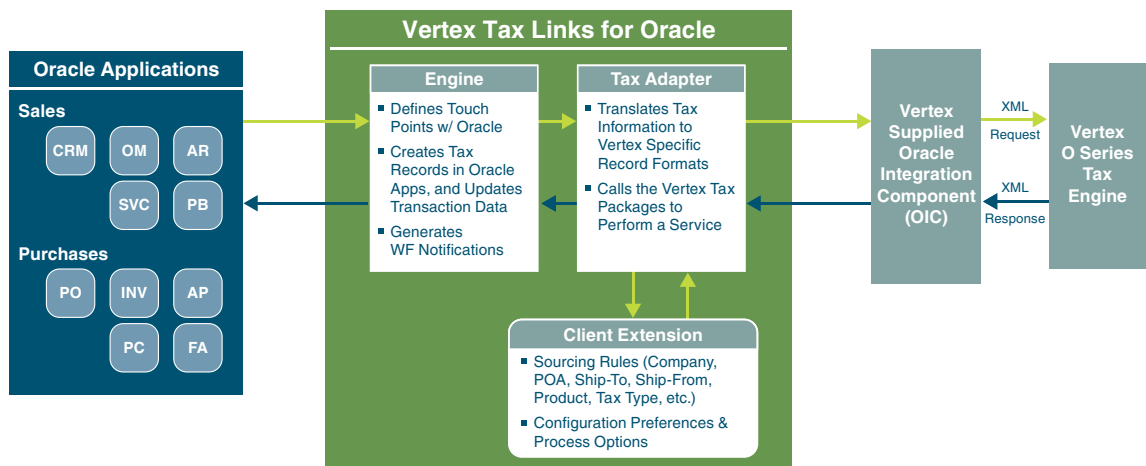

- Order Management
- Accounts Payable
- Accounts Receivables
- Purchasing
- Service
- Inventory
- Projects

A Global Tax Solution

Vertex O Series is the solution that supports your Oracle enterprise software at every level around the world. The system helps ensure compliance with all state, local, federal, and international taxes. With over 300,000 tax rules, Vertex O Series keeps you in control of taxes at every level, and offers powerful features you won't find in native Oracle tax tables, including:

- Global Tax Data Content – rates and taxability rules are updated monthly by Vertex
- Centralized visibility into the tax requirements of all global business units, for greater control and management of decisions and processes
- TaxGIS – the most advanced tax jurisdiction identification tool makes tax reporting and compliance easier, and virtually eliminates customer service and invoice collection problems that result from inaccurate tax
- Tax transaction reporting tools that complete end-to-end compliance activities
- Data management tools that support audit processes with standard reporting at detail and summary levels, as well as flexible data analysis tools for ad-hoc reporting, customized to your company's needs

Frequently, tax decisions must be made by individuals or groups within an organization who may not have tax expertise. This requires time-consuming input by the tax department on the details of individual transactions. With Vertex O Series, the responsibility for tax decisions is centralized within the tax department. This frees your internal resources from tedious functions like manual processing, research, and filing, allowing them to focus on value-added efforts like tax planning and reverse audits.

Integration with Oracle E-Business Suite

The Vertex® Tax Link for Oracle® ensures that every financial process with a tax consequence administered through Oracle will be accurately calculated and reported. Developed using Oracle standards and guidelines, the Vertex Tax Link for Oracle is the bridge between Vertex O Series and Oracle E-Business Suite Applications, both 11i and R12.

Simplified Tax Management

Vertex O Series software delivers advanced sales, consumer use, lease, and value-added tax capabilities. Going far beyond the capabilities of native Oracle tax applications, Vertex O Series addresses both international and domestic taxes, including VAT, origin-based taxes, quantity thresholds, municipal and district taxes, ship-to and ship-from taxes, and much more, including:

- Real-time and batch tax calculation
- Multi-currency transaction support
- Easy-to-customize tax calculation rules
- Line-level calculation
- Compact tax records with detailed information
- Single and multi-tier configuration support
- Creation of a tax-sensitive database
- Accurate reconciliation through synchronized Oracle and Vertex processes

Vertex O Series software allows you to prepare, calculate, file, and defend all levels of tax. Now, your tax personnel can access the information they need from anywhere across the globe, ensuring that international and domestic tax calculations are being accurately and automatically reconciled.

Best of all, you don't have to wait for IT resources to tailor your solution to your needs. Build the reports you require with drag-and-drop ease.

20-year Vertex/Oracle Partnership

Vertex has been an Oracle partner for more than 20 years, and is the only tax software provider to be named an Oracle Certified Advantage Partner. This strong partnership means that when Oracle launches development strategies such as the Fusion application and E-Business Tax, Vertex is involved from the onset. Today, over 800 Oracle customers benefit from Vertex's comprehensive tax content and process automation tools, integrated across the Oracle E-Business Suite.

Vertex® Consulting Services has a long-standing history of providing automated transaction tax solutions to numerous clients running Oracle ranging in size, industry, and technical environments. With over 80 years combined experience, we continue to leverage our respective skill sets to address the varying needs of our ever-changing customer base, while at the same time, adapting to changes in the technology industry.
