### **Vertex, Odessa Partner on Leasing Software Integration**

Vertex Inc., a provider of tax technology solutions, announced that it has expanded its partnership with Odessa Technologies Inc., a provider of software solutions for the leasing industry.

The expanded partnership has resulted in the creation of a software interface that integrates Vertex Lease Tax O Series with Odessa's Internet-based LeaseWave solution.

"Our partnership with Vertex continues to deliver substantial new business benefits and technology advantages to tax departments everywhere," said Madhu Natarajan, CEO of Odessa Technologies. "This latest software integration gives LeaseWave customers a competitive edge by allowing them to rapidly modernize and optimize their tax departments with the most powerful tax processing product on the market."

Vertex Lease Tax O Series and LeaseWave integration offers an end-to-end leasing system through a Web-based software platform designed to manage portfolios from application processing through to lease termination.

The product includes Vertex's comprehensive data set-which includes taxability categories for all equipment types and rates and rules that drive leasing tax calculation results.

"The partnership between Vertex and Odessa has resulted in a leasing industry solution that will greatly improve tax department efficiency and dramatically reduce tax processing costs and compliance maintenance," said Jack Ferraioli, vice president of customer relationship development at Vertex. "Vertex maintains our industry leading position and commitment to our customers to provide tax compliance solutions that free tax departments to focus on more strategic tax issues."
