

An On-Demand Option for Vertex Direct Tax Solutions

Vertex offers both hosted and on-premise deployment options for the full line of income tax solutions:

- Vertex® Provision
- Vertex® Income Tax Domestic
- Vertex® Income Tax International
- Vertex® Data Collect
- Vertex® Workflow Manager
- Vertex® Document Manager
- Vertex® Tax Calendar
- Vertex® Income Tax Reporting & Analysis

A SaaS Solution for Income Tax Management

Vertex provides anytime/anywhere access to your income tax system without an extensive on-premise installation. The hosted, on-demand solution offers faster go-live to access system features and functionality immediately. Plus, the SaaS option eliminates:

- Up-front capital expenses of hardware platforms and software licensing
- Downtime required for system installation and implementation
- Cost of system maintenance, upgrades, and patches
- Complex internal system requirements and in-house IT support, and
- Costly backup data systems

Flexible Access & Centralized Maintenance

The online solution is accessible from any computer with Internet access, eliminating your need to manage application access across multiple locations – from headquarters, to subsidiary and branch locations, to mobile and remote offices. It also provides tax application and database management in one central location, so your tax staff is freed from time-consuming tasks like application upgrades and data backups.

Enhanced Security

The Vertex-hosted solution features a secure environment that utilizes a high-speed, redundant backbone and network management expertise to provide state-of-the-art infrastructure support and reliability. Your data stays on our servers while you work via a remote session over the Internet in an encrypted, unreadable format that enhances the security of your sensitive tax information. In addition, password management, a dual firewall system, and physically secure servers eliminate the risk of unauthorized access to your data.

SAS 70 (SSAE-16) Compliance

For public companies required to submit internal financial audit control information, the solution is SAS 70 (SSAE-16) compliant. This significantly reduces the need for you to perform such tasks as parallel testing and internal audit review.
