VERTEX® + **ORACLE**®

Vertex® Indirect Tax Accelerator for Oracle Cloud ERP

Powerful Global Tax Integration Solution.

The Vertex Indirect Tax Accelerator for Oracle Cloud ERP is a robust, advanced integration allowing nearly push-button setup of the Vertex tax engine. A powerful user interface streamlines the integration processes, improving the time-to-value of a Vertex tax engine for Oracle Cloud ERP customers while reducing the risks inherent in implementation.

Faster Time-to-Value

The advanced technology of the Vertex Accelerator automates and streamlines previously manual processes and time-consuming setup scripts to enable Oracle Cloud ERP users to proceed quickly to the business configuration of their Vertex tax engine This dramatically increases the time-to-value and improves the ROI.

A modern, intuitive graphical user interface guides the user through the setup of the Vertex integration providing visibility and control at every step.

The integration allows Oracle Cloud ERP users to spend less time on basic implementation steps and invest more time in strategic business processes. It enables faster, more intuitive adjustments to tax configuration to support business changes like M&A, new products, and new regions as well as tax changes.

Benefits:

+ Improves the time-to-value.
+ Optimizes the implementation process.
+ Reduces the risk inherent in the system implementation process.
+ Improves visibility and control over the Oracle and Vertex integration.
+ Increases ease of use and saves time in system maintenance.
+ Improves tax calculation accuracy.
+ Improves reporting and data insight for better decisions.

Three decades of partnership

Since 1992, the formal partnership between Oracle and Vertex has helped more than 1,500 companies grow their businesses while sustaining tax compliance and mitigating audit risk.
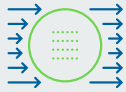

Powerful user interface streamlines process and improves control

Features

Onboarding Dashboard

Automate customer configuration steps and view progress. Easily onboard multiple instances faster.

Setup Tax Actions and Rule-based Data Mapping

Automate the configuration and addition of rules for improved efficiency.

Master Data Import

Automate the import of master data setup to reduce time and reduce manual data risks.

Real-Time Testing

Increase efficiency with real-time testing for pre-go-live and post-go-live.

Data Enrichment

Improve tax accuracy and reporting with richer transaction data.

Transaction Monitoring

Monitor transaction data flows to improve visibility, troubleshooting, and issue resolution.
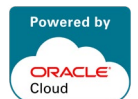

Automated Reporting

Schedule automated data extracts and reports to reduce steps and streamline operations.

Comprehensive Tax Support

Supports sales, use, and value added tax for global tax management.
