

Vertex and SAP Commerce Cloud

Sales, use, and value added tax determination

Improve tax determination with Vertex

Vertex provides powerful, automated tax determination for SAP Commerce Cloud. A seamless integration enables location identification as well as complex taxability logic to deliver a precise tax calculation for every transaction. Integrating a Vertex tax engine ensures the latest tax content with reduced system update requirements.

Robust Integration

Utilizing Vertex solutions as part of an overall SAP Commerce Cloud deployment reduces risk, streamlines audit processes, increases audit defense, and frees up internal resources to work on higher value projects than tax rate and rule management.

Organizations can enjoy complete integration between the two platforms -- there is no custom engagement required. Just configure SAP Commerce Cloud sellable products for proper taxability during the initial, integrated setup process.

Our Partnership

For over 25 years, Vertex and SAP have worked closely together driving innovation and better business outcomes for our joint customers. Our partnership allows customers to benefit from automated tax technology and integrated solutions that enable more accurate and consistent taxation across the enterprise, and around the world. That is why SAP not only trusts Vertex to support their customers, but also relies upon Vertex solutions to meet their own business needs.

Powerful Benefits
