

Vertex O Series for Hospitality

Automated tax determination for the lodging industry

Opportunity for travel booking companies has exploded in recent years, but the complexity of lodging taxes in the U.S. could limit profitability. Vertex O Series for Hospitality offers an automated solution.

Streamline the billing process

Hotels and travel booking companies across the U.S. have a significant challenge to stay ahead of complex lodging tax rules and rates. Ideally, they want to quickly generate accurate invoices to keep the guests satisfied and turn over the room/home to the next guest. Vertex O Series for Hospitality automates the tax calculation step to keep billing running smoothly and reduce tax audit risk.

Improve tax management for complex lodging transactions

Integrating Vertex O Series for Hospitality to your billing system removes the manual steps of updating tax content in your billing system. This not only streamlines the billing process but improves tax accuracy and consistency.

Latest Tax Content

At the core of the solution are U.S. lodging tax rules and rates, continually updated by the Vertex Research team. The powerful O Series tax engine delivers real-time tax calculation for each transaction based on location and taxability.

Reduce audit risk

Automating the calculation of lodging tax streamlines billing and improves tax compliance for the booming travel industry. Add lodging tax content to your Vertex O Series tax engine to increase tax accuracy and streamline internal processes.

Benefits

Reduced internal processes

Reduced audit risk

Improved agility

Increased scalability
