

Vertex and Mirakl

Seller Configuration, Sales and Value Added Tax Determination

Improve tax determination with Vertex

Vertex provides powerful, automated product and seller configuration, and tax determination for the Mirakl marketplace platform. A seamless integration enables location identification as well as complex taxability logic to deliver a precise tax calculation for every transaction. Integrating a Vertex tax engine ensures the latest tax content with reduced system update requirements.

Robust Integration

Vertex offers a globally certified and validated integration enabling users of the Mirakl Marketplace Platform to leverage Vertex O Series for tax determination of sales, use and value-added tax (VAT).

This seamless integration includes powerful seller and product onboarding features to accelerate set-up and reduce maintenance for marketplace operators. The integration automates the ongoing setup and maintenance of seller data inside Vertex. And Vertex solutions can also support and enhance any integration with other e-commerce partners and platforms.

Our Partnership

A trusted Mirakl partner, Vertex continues to develop and deliver innovative tax solutions to help customers extend the value of their marketplace platform investment, streamline product and seller onboarding, tax determination and compliance, and accelerate business growth.

The Vertex connector is globally certified and validated to meet Mirakl's strict standards for security and performance.

Powerful Benefits

Extend the value of the Mirakl system.

Improved ROI and faster time-to-value with the Vertex tax engine.

Increased efficiency of Finance, Tax, and IT teams.

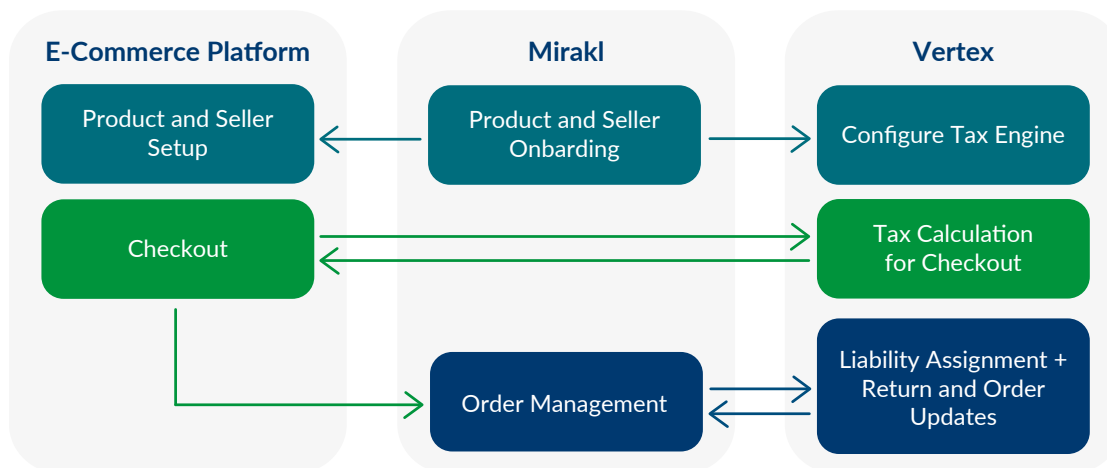

Improved scalability.

Backed by a global Vertex team of knowledgeable implementation consultants and support specialists.

Tax Determination for Mirakl

Supports and enhances any integration with an e-commerce partner for seller setup and tax validation, while also providing a seamless integration between the Mirakl and Vertex to support tax validation and updates within the order management process.
