Automated Global Determination

A Vertex tax engine provides a globally accessible tax framework - reliable, efficient, scalable, and secure tax determination for NetSuite organizations.

- Global tax rates, legislative, and jurisdiction changes are automatically updated and maintained.
- Multi-jurisdictions, multi-channels, multiple source system support
- Centralize, structure, and tax-sensitize business data across sales and procurement
- Streamline accurate estimates, invoicing, billing, payment, and CTC support
- Reduce (or eliminate) monthly tax research
- Eliminate tax content updates in every supported system
- Eliminate need for IT to manage custom code, custom configuration, master data updates, content updates, custom reporting & data analytics
- Improve tax accuracy on standard and complex scenarios
- Manage exemptions, currency, and B2G/B2B VAT ID validation
- Support high transaction volumes and large invoices
- Improve reporting for reconciliation, recovery, and audit defense and inquiries
- Be ready for customer inquiries and audit defense

Robust Integration

Vertex's Built for NetSuite-certified integration for NetSuite SuiteTax is developed in collaboration with NetSuite's product team, delivering faster time-to-value through prebuilt, SuiteTax-compliant connectors and NetSuite-validated APIs. The solution evaluates over 100+ data elements per transaction to ensure accurate tax calculation and compliance across global tax regimes including VAT, GST, SUT. Tax logic is seamlessly embedded within NetSuite's Procure-to-Pay (PtP) and Order-to-Cash (OtC) processes — covering purchasing, sales, billing, and ecommerce transactions — providing scalable, audit-ready, language-agnostic tax data for invoicing, payment, and reporting across your entire business.

Continuous Compliance Control

Integrating Vertex to NetSuite not only improves tax determination on every transaction, but centralizes and structures tax data across sales and procurement. It supports downstream tax processes, improving localized invoicing, e-invoicing, reconciliation, compliance/reporting, and audit performance.

Global Tax Compliance and e-Invoicing

Vertex provides NetSuite's multi-national users with a single, integrated, cloud platform to streamline multi-system compliance for periodic returns, e-invoicing, and e-reporting across the organization.

US/Canada Returns

- Integrated calc & returns using Vertex O Series Cloud & Vertex Express Returns
- Full-function automated returns generation from any data source using Vertex Indirect Tax Returns North America
- Outsource SUT, CUT, and Canada GST compliance – from returns generation and approval, to filing, remittance, and notice management.

Global, e-Invoicing and VAT Returns

- Single connection points to automate multi-country, multi-entity VAT obligations for sales and purchasing transactions
- Continuous transaction control to meet global reporting requirements
- Digitization mandates supported worldwide – SAF-T, UK MTD, Spain SII, and the latest e-invoicing regulations
- e-Invoice creation, validation, submission & clearance (including Peppol) returning necessary artifacts back to the billing system
- Periodic VAT reporting including VAT ID validation, built-in currency conversion, and aggregated or consolidated reporting
- Automated reconciliation between e-invoicing, e-reporting, and periodic filing
- Standardize data, streamline workflows, and defend audits

Continuous Transaction Control

Automate, govern, and defend e-invoicing, e-reporting, and period filing:

- Collect the right data from your ERP for each reporting requirement
- Ensure invoices or billing docs are signed, cleared, reported, and returned
- Ensure periodic reports and returns are created accurately, validated, reconciled, and centralized
- Built-in status tracking, workflow, archiving, and audit support to meet internal pressure, external deadlines, and inquiries.

Robust Integrations

Vertex pre-built and validated compliance integrations and integrated returns for NetSuite translate calculation data into compliant reporting. This saves time and drives efficiency collecting the right data, improving data accuracy, and streamlining the compliance process.
