Automated Tax Determination

Vertex provides a prebuilt tax framework for Microsoft D365 organizations - reliable, efficient, scalable, and secure tax determination.

- Tax rates, area ids, codes and legislative and jurisdiction changes automatically updated and maintained across industries, products and services
- Multi-jurisdictions, multi-channels, multiple source system support
- Centralize, structure, and tax-sensitize business data across sales and procurement
- Streamline accurate estimates, invoicing, billing, and payment, and CTC support
- Reduce (or eliminate) monthly tax research
- Eliminate tax content updates in every supported system
- Eliminate the need for IT to manage custom code, custom configuration, master data updates, content updates, custom reporting & data analytics.
- Improve tax accuracy on standard and complex scenarios
- Manage exemptions, currency, and B2G/B2B validation
- Support high transaction volumes and large invoices
- Improve reporting for reconciliation, recovery, and internal analysis
- Be ready for customer inquiries and audit defense

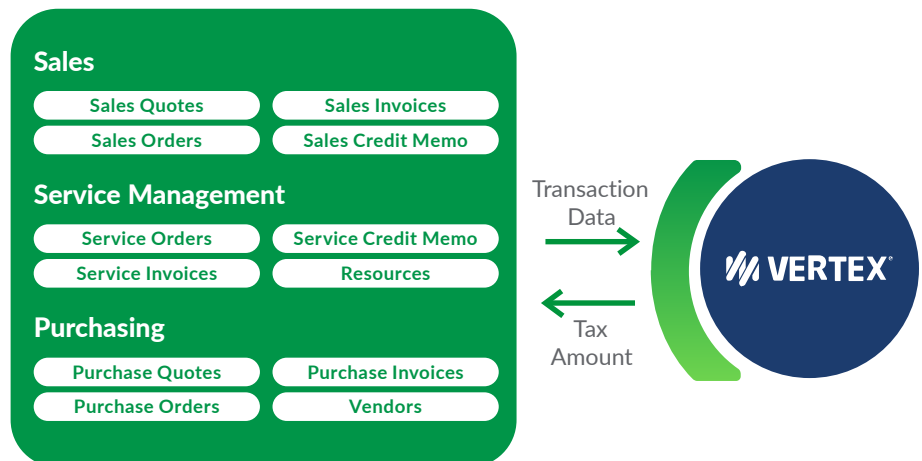

Robust Integration

Vertex's embedded integration for Microsoft Dynamics 365 Business Central is co-developed with Microsoft's Globalization Studio team, delivering faster time-to-value through prebuilt connectors and Microsoft-validated APIs. Our solution evaluates 100+ data elements per transaction to help ensure precise tax determination globally, localized across multiple tax regimes including SUT, CUT, GST. Tax logic is embedded across Procure-to-Pay (PtP) and Order-to-Cash (OtC) processes—covering procurement, sales, project management, accounts payable, and commerce tools like MPOS/CPOS and ecommerce—ensuring language-agnostic, scalable, and audit-ready business data for invoicing, payment, billing, and compliance across the entire supply chain.

Continuous Compliance Control

Integrating Vertex to Microsoft D365 Business Central not only improves tax determination on every transaction but centralizes and structures tax data across sales and procurement. It supports downstream tax processes, improving localized invoicing, e-invoicing, reconciliation, compliance/reporting, and audit performance.

Global Tax Compliance

Vertex provides Microsoft multi-national users with a single, integrated, cloud platform to streamline multi-system compliance for periodic returns and e-reporting across the organization.

US/Canada Returns Options

- Integrated calc & returns using Vertex O Series Cloud & Vertex Express Returns
- Full-function automated returns generation with data from any source using Vertex Indirect Tax Returns-North America
- Outsource SUT, CUT, and GST compliance— from returns generation and approval, to filing, remittance, and notice management.

Global Returns & Reporting

- Single connection points to automate multi-country, multi-entity VAT obligations for sales and purchasing transactions
- Continuous transaction control to meet global requirements
- Digitization mandates supported worldwide including ECSLs, Intrastat, Ledgers, SAF-T, UK MTD, e-Invoice creation, validation, submission & clearance (including Peppol)
- Automated VAT returns preparation including VAT ID validation, built-in currency conversion, and aggregated or consolidated reporting
- Automated reconciliation between e-invoicing, e-reporting, and periodic filing against the Microsoft GL
- Compliant data integrity checks, streamlined workflows, and audit defense reporting and document archiving

Continuous Transaction Control

Ensure continuous compliance - automate, govern, and defend across multiple systems under a consolidated platform:

- Collect the right data from your ERPs for each reporting requirement
- Ensure invoice or billing docs are signed, cleared, reported, and returned
- Ensure local reports and returns are created accurately, validated, reconciled, and centralized
- Built-in status tracking, workflow, archiving, and audit support to meet internal pressure, external deadlines, and inquiries.

Compliance Integrations

Vertex pre-built and validated compliance integrations and integrated returns for Microsoft Business Central translate calculation data into compliant reporting. This saves time and drives efficiency collecting the right data, improving data accuracy, and streamlining the compliance process.
