

Accelerating Tax Processes in SAP with Vertex Accelerator+

How You Can Boost the Performance
of Your Vertex Tax Engine

The Vertex O Series tax engine is a trusted solution for organizations using SAP ERP, offering accurate and reliable global tax determination. Its robust content and advanced features provide the foundation needed for tax compliance and risk reduction. **However, for businesses looking to further enhance and accelerate their tax processes, Vertex Accelerator+ for SAP ERP takes tax management to the next level.**

Adding Vertex Accelerator+ for SAP ERP

Vertex Accelerator+ for SAP ERP is a robust tax engine configuration and management tool for sales, use, and value added tax. The solution fulfills required tax functions which are not built into SAP native functionality. Accelerator+ provides advanced data mapping, troubleshooting, comprehensive reporting, and more to create a unified tax solution for SAP ECC and S/4HANA that satisfies various industry tax requirements without changing SAP's underlying, pre-defined, region-based technology.

This next-gen solution makes it easier to manage global indirect tax, enable business growth, facilitate cloud transformation initiatives, and lay a solid foundation for SAP S/4HANA migration.

Powerful Benefits

Adding Accelerator+ puts more control of the tax system in the hands of the tax user. The added control reduces the need to rely on internal IT for tax system configuration changes, thereby simplifying tax management and empowering your team to take ownership of the entire process.

Accelerator+ not only enhances upstream tax accuracy but also structures data to support near-real-time reporting, invoicing, and downstream compliance. It delivers a unified tax experience for all SAP businesses, regardless of location, business model, or entity structure.

Top benefits of Accelerator+ include:

- Greater control over tax processes
- Unified tax experience for all SAP businesses
- Improved visibility
- Reduced dependency on IT
- Foundation for SAP S/4HANA migration

Features of Vertex Accelerator+

Accelerator+ is packed with features that enhance tax management in SAP ERP. Here are some highlights:

- **Centralized Management:** Accelerator+ provides a central, unified user interface into the configuration, management, and utilities for the Vertex O Series integration to SAP ERP.
- **Simplified data field mapping:** Drag and drop mapping of tax data to be passed to the O Series tax engine.
- **VAT Determination Options:** Utilize the Vertex O Series tax determination engine or the native SAP tax function with our SAP add-on for VAT.
- **Tax Jurisdiction Lookup:** To adhere to US/CAN SAP RFC requirements, Accelerator+ uses the Geo-location identification to identify the tax jurisdiction that will be assigned in master data.
- **Tax Code Defaulting:** Helps automate the tax code process to a more tax-centric methodology than standard SAP capability.
- **Queue Maintenance Tool:** Improve troubleshooting by identifying and removing the blocking transactions to allow other transactions to be updated, then reprocess the blocked transactions once corrected.
- **Goods Movement Solution:** Configurable solution to handle use tax accrual for specific requirements.

Streamline Migration to SAP S/4HANA

Adding Accelerator+ in your current SAP environment improves tax management now and gets you ready for SAP S/4HANA migration with minimal configuration effort when it's time to convert.

- **Tax Code Upload Tool:** Eases the maintenance of tax code settings in SAP ERP.
- **Tax Code Setup Report:** View tax code properties in a report vs viewing in individual tax code settings.
- **Advanced Reporting:** Accelerator+ brings a long list of predefined extracts and reports that have been identified from customer experience to address day-to-day business needs. Utilize existing SAP tax codes and reports to create comprehensive global reports.
- **Reconciliation Reports to SAP General Ledger:** Complements SAP reporting. Vertex O Series data are retrieved and available in SAP.
- **Built in RFC Queue Monitoring:** SIC connection and RFC Queue status monitoring options are customizable and configurable, including action to be taken and frequency, for example auto-email designated individuals or group.
- **Aligns to SAP's Clean Core strategy:** The Vertex approach is to support and align to the SAP Clean Core strategy and integrate into the cloud ERP core. Therefore, Vertex solutions are SAP-certified and delivered without core mod changes or implicit enhancements.

Get Started with Vertex Accelerator+

Take control of tax processes in SAP ERP by adding Vertex Accelerator+. You'll streamline tax operations, reduce dependencies on IT, and ensure a more transparent, user-friendly tax environment.
