

Vertex® Tax Links for SAP Hybris

Powerful, Automated Sales and Use Tax Calculation. Streamlined Hybris Experience.

Vertex provides best-in-class tax calculation solutions, whether in the cloud or on-premise—and now, Vertex offers a standard suite of functionality created specifically for SAP Hybris.

Vertex® Tax Links for SAP Hybris improves sales tax capabilities without costly custom integration development. The integration has been designed to act as a bridge between transactions in SAP Hybris and tax calculation within Vertex, ensuring that each and every transaction leverages the full calculation potential and powerful automation of Vertex.

Reliable Tax Content

Vertex centralizes all the rates and rules required for accurate calculation of sales and use tax as well as product taxability. With powerful Vertex automation, your tax department will no longer need to manually manage changing tax content. This doesn't just simplify complex transaction processing within SAP Hybris, but also dramatically reduces the potential for incorrect tax calculation. Utilizing Vertex solutions as part of an overall SAP Hybris deployment reduces risk, streamlines audit processes, increases audit defense, and frees up internal resources to work on higher value projects than tax rate and rule management.

Ease of Use

By leveraging Vertex for SAP Hybris, organizations can enjoy complete integration between the two platforms with no custom work to the eCommerce system. There is no custom engagement required and organizations simply configure SAP Hybris sellable products for proper taxability during the initial, integrated setup process. This effectively removes requirements for the tax department to spend their valuable time manually updating tax schedules within Hybris.

Automated Tax Calculation in Both B2B & B2C Storefronts

The B2B and B2C modules within SAP Hybris are the cornerstones of order entry for organizations leveraging SAP Hybris for their eCommerce storefront. Normally, the tax department has to manage the taxability of each product sold through SAP Hybris, and ensure that tax is properly calculated within both of the B2B and B2C storefronts. However, once Vertex is integrated into SAP Hybris, your solution handles this function automatically, and seamlessly. Vertex supports full sales tax management, regardless of the storefront that is being used, ensuring that every transaction that moves through the B2B and B2C modules has been taxed appropriately.

Integrated Address Cleansing

With any eCommerce solution, the single most critical aspect of tax calculation is jurisdiction identification. Vertex has tightly integrated our unique address cleansing solution into SAP Hybris to ensure that every single transaction has the proper jurisdiction assignment to trigger the accurate tax calculation rules. When you enter new addresses into SAP Hybris, Vertex is able to examine the address, correct for inaccuracies, and return a full 9-digit zip code

Vertex[®] Tax Links for SAP Hybris

and the relevant Tax Area ID. This happens as a seamless part of the checkout process within the Hybris store, ensuring that bad addresses don't slip through the order entry system.

Tax System Implementation

In addition to developing powerful system integrations, the Vertex Consulting practice provides Vertex system implementation with SAP Hybris to help you accelerate the startup and maximize the value of your Vertex Indirect Tax solutions, whether you require a cloud or on-premise solution.

For more information about the Vertex and SAP Hybris integration, contact your Vertex representative at **800.355.3500** or visit vertexSMB.com/connectors/sap-hybris today.

About Vertex

Founded in 1978, Vertex Inc. is the leading provider of corporate tax software and services for companies of all sizes, from small to medium-sized businesses to global multinationals.

Vertex solutions enable companies to realize the full strategic potential of the corporate tax function. The company offers a variety of products and services that allow businesses to automate, integrate, and streamline their corporate tax processes. Vertex provides solutions in every major line of tax including income, sales and consumer use, value added and payroll. Vertex also offers tailored solutions for specific industries including retail, communications, hospitality and leasing. Vertex Managed Services allows companies to outsource sales and use tax returns and exemption certificate management.
